

Meet your new best friend

What to look for in a new friendship.
Reliability and security.

When it comes down to it, isn't it all about choosing the right business partner so that you can enjoy the amazing feeling of finally being understood.

Do you find it hard to source both quality and experience from a Business Intelligence (BI) consultancy?

Worried about premium rate BI consultancies?

Scared of the hidden costs of cheap offshore provision?

Promises of deliveries that were never met. Excessive fees and systems that don't deliver the results. We've heard all the horror stories, with money pouring out and no business benefit coming in. Where do you start with drawing up the quality criteria wish list for the perfect BI consultancy partner? Have you thought about mingling with a different crowd? A crowd that will amaze you with their flexible and 'cut-to-fit solutions' approach.

It's time to think beyond contractors and agencies and experience a new kind of approach which will leave you feeling so refreshed.

THINK BEYOND | THINK 6PM

BUSINESS OBJECTS CONSULTANCY

Think of a new best friend. Think 6pm. Here's how.

We offer the right combination of Price and Quality to satisfy a business case, without increasing the risk of failure. Whether you need to augment your current Business Objects team or need a partner to provide a complete BI solution, we are right behind you, fitting snugly into your wish list and focused on providing results. All the time.

We believe that understanding the context of a requirement is as important as our technical knowledge, so we start by listening. To your needs. Your previous experiences. Your goals. By doing this we adopt your challenges as our own, in order to enable demonstrable business value. We become a collective, empowered force for you to utilise. Each 6pm consultant is a BI craftsman with an incredible passion for their work and the ability to contribute individually and as part of a team.

6pm's Business Objects Consulting covers all aspects of a full-solution delivery including:

- Requirements Analysis
- Solution Architecting
- Data Mart & Data Warehouse Design
- Universe Design
- BusinessObjects™ Web Intelligence®
- BusinessObjects™ Desktop Intelligence™
- Crystal Reports®
- Xcelsius®
- BusinessObjects™ Dashboard Builder
- BusinessObjects™ XI Migration
- BusinessObjects™ XI Installation & Administration
- BusinessObjects™ Data Integrator
- BusinessObjects™ Data Quality

BusinessObjects™ XI Migration

At some point you may consider migrating from a legacy release to XI to leverage the best and latest that Business Objects offers. With over 6 years of Business Objects expertise, we have developed a special skill for understanding and meeting the challenges of migrating to a new platform. What's more, our consultants have in-depth and proven experience with legacy releases.

We understand that poor data leads to poor reports! Where is the data? What form is it in? Is it clean and de-duped? Are you going to ETL or ELT? How often? For whom? Are you going down the old route of lots of reports in hope of finding the answer? Or are you going to "surf" and then have focused reporting? We speak your language, understand your questions, find answers and quick-route paths to your goals. You are unique, and we treat you that way.

Our specialist BI Consulting division can provide a Holistic view of Business Intelligence - encapsulating the disciplines of Data Warehousing, Data Integration, Data Quality Improvement and Testing together with Reports and Knowledge Management, to provide you with a complete and fully integrated Business Intelligence Solution.

We're unique too!

Quick™ BI, our report prototyping tool, will radically accelerate the capture of requirements and significantly reduce the time it takes to place your Business Objects reports in the production environment.

Our flexible structure allows you to utilise our expertise in the most effective and efficient manner that best meets your needs. We can assist you in all scenarios from team augmentation and post-deployment support to the delivery of well defined, discrete projects. Should you be looking for an off-site - on-site or hybrid solution, we will also ensure that you will enjoy significant cost advantages.

IT and relationship experts.

Call us and ask about our Business Objects Consultancy. We'd love to chat.
